Professional Summary

Results-driven Full Stack Web Developer with **2+ years of industry experience**, specializing in **web and Android application development**. Started as a fresher and quickly progressed to managing **end-to-end development**, including **DevOps, client handling, database design, and full SDLC management**.

Experience

1] Mindcodes IT Solutions

April 2023 - Present
Pune

Role: Full-Stack Developer & Project Lead

- Led the end-to-end development, deployment, and delivery of two major projects: **CA Smart Office Web Application** and **Combat Management Kit (CMK)**. Managed all phases of development, including architecture, coding, deployment, and maintenance, while ensuring seamless integration and optimal performance.
- For **CA Smart Office Web Application**, I led the frontend and backend development using **Next.js** and managed the **PostgreSQL** database.
- For **Combat Management Kit (CMK)**, I oversaw the entire project lifecycle, from requirements gathering to system architecture design, coding, and delivery, ensuring successful integration and functionality using **Kotlin, Java, and WebSockets**.

2] PentaShield Technologies PVT LTD (part-time)

January 2024 - June 2024
Vadodara

Role: Team Leader, Video Surveillance & Management System

- As a team leader, I was responsible for overseeing the full development lifecycle of the VMS, managing both the frontend, backend, and database components.
- I led the team in integrating advanced technologies for IP camera functionality, detection models, and real-time video processing. During this project, I executed my skills in network protocols, video stream handling, and image detection models.

Technologies :- Angular , Python flask (API), Database:- Postgres

Education

Dy Patil School Of MCA Pune Maharashtra

9.36 (SGPA)

November 2022 - May 2024

Master of Computer Application (MCA))

Smt. Maherbanu College of Science Akola

Maharashtra

80 %

July 2019 - July 2022

Bachelor of Computer Application (BCA)

ASM Geetamata College Pune

June 2017 - March 2019

HSC

Holy Cross Convent High School Akola

81.40 %

2017

SSC

Interests	Cricket, Coding ,Cycling, Gymming, Reading		
Skills	Operating System Linux,Windows , MacOS ,android		
	Programming Languages Python,Golang, Java, Kotlin, Dart, JavaScript, TypeScript, PHP, C++, C		
	Web Technologies Angular, Next.js, React, HTML5, CSS3,tailwind CSS		
	Libraries/Frameworks Node.js, React Native, Flutter, FastAPI, Pydantic, SQLAlchemymy, Uvicorn, NumPy, Pandas, AWT/Swing, Spring Boot,Hibernate.		
	Tools / Platforms Docker, Android Studio, XAMPP, Replit, Git, VSCode, Apache NetBeans, Sublime Text, IntelliJ, Hostinger, GoDaddy, Google Play Console , AWS		
	Databases Postgres , MySQL, MongoDB, SQLite		
	Management Skills Project Management, Team Leadership, Client Relationship Management, Effective Communication, Negotiation Skills, Process Improvement, Analytical Thinking, Decision-Making, Adaptability		
Certifications	Python Master Certificate Codsoft Technologies https://www.codsoft.in/	January 2024	
	Java development CodSoft Technologies https://www.codsoft.in/	February 2024	
Major Project For Zoho Corporation Pvt. Ltd			April 2025
<u>Dendrite-whiteboard: Full-Stack Developer & Project Lead</u>			
- Developed a collaborative Whiteboard web application using React, TypeScript, and Keycloak for authentication and user management. - Integrated Keycloak SSO (Single Sign-On) for secure login, session management, and role-based access control. - Built a custom Keycloak Provider in React to manage authentication state across the app efficiently. - Designed and implemented real-time drawing features allowing multiple users to interact on a shared canvas. - Utilized Bootstrap and React Context API to create a responsive, modular, and scalable UI/UX. - Handled error boundaries and ensured graceful error recovery for authentication and WebSocket connection failures. - Set up role-based route protection ensuring different access levels based on user roles. - Integrated token refresh logic to maintain seamless user sessions without manual re-login. - Followed best practices in React, ensuring clean component architecture and separation of concerns (services, context, components). - Emphasized security, performance optimization, and code reusability throughout the project.
